

Dear Dr. Henney,

I am writing to express my concern over the FDA's regulation of genetically engineered (GE) food. I request that the agency's PM current policies be changed, and I support all the points in docket #00P-1211 \CP1 03 OCT

☒ All GE foods should be labeled so that consumers are informed and have a choice.

☒ GE foods should not be assumed to be "generally recognized as safe" and should have mandatory pre-market safety testing

☒ There should be a moratorium on GE foods until long-term studies show they are safe for human health and the environment.

(Additional Personal Comments:) if GE Foods continue to be Produced they should be at least confined to indoor growing and not on a field where the Pollen could be Blown to non GE fields
